

## Compress DAO – Whitepaper

### **Executive Summary**

Compress DAO is a Web3 community initiative designed to support early-stage startup projects through community voting and structured social task rewards.

All funding is fully provided by the core team.

The \$comD token serves purely as a symbolic tool for community identity and branding — it is not used for governance.

### **Mission**

To build a vibrant and engaged Web3 community that collectively supports and accelerates early-stage startup growth through open participation and strategic backing.

### **How It Works**

#### 1. Project Application

Web3 startups may apply for support and funding through Compress DAO's community process.

Eligibility Requirements:

Pre-idea or pre-seed stage

Must allocate 5% of the project's total token or coin supply, divided as follows:

2% to Compress DAO (non-vested)

3% for social task reward distribution (non-vested)

Allocation must be fully unlocked (no vesting)

Strong, committed team with a viable business model and sound tokenomics

Approved projects receive \$50,000 USD in private funding from the core team.

## 2. Community Voting

Community members vote on submitted projects. Projects with the highest votes move forward to receive funding and ecosystem support.

## 3. Support for Selected Projects

Top-voted projects will gain:

Private funding

Exposure to an active community

Access to a custom social task system to boost user acquisition and public awareness

## 4. Social Task System

Community members can complete simple, free engagement tasks such as:

Following social media accounts

Retweeting, joining Discord servers, sharing updates, and more

## 5. Community Rewards

3% of each project's allocated tokens or coins are distributed as social task rewards.

Rewards are distributed equally to all task participants and may include tokens, coins, or NFTs depending on the project.

## **Tokenomics – \$comD**

Total Supply: 3,000,000,000 tokens

Waitlist Users: 50% (10,000 tokens per user, no vesting)

Liquidity: 10% (fully unlocked at launch)

CL Pass Holders: 5% (fully unlocked at launch)

Marketing: 5% (for partnerships and awareness campaigns)

Team & Advisors: 30% (5% unlocked at Token Generation Event TGE 95% vested linearly over 24 months)

The \$comD token is not used for voting. It functions solely as a symbol of identity and branding within the community.

Transaction Tax: 5% on both buy and sell transactions

### **CL Pass – NFT Access Pass**

Total Supply: 3,333 NFTs

Utility:

Early access to private sales within the ecosystem

Access to a private community and exclusive online/offline startup presentation events

### **Project Funding Model**

All funding is privately sourced from the Compress DAO core team.

Each approved project receives \$50,000 USD in funding.

Projects also gain access to a pool of engaged users through social campaigns designed to accelerate growth.

### **Roadmap**

Whitepaper release

Waitlist campaign for user onboarding

CL Pass launch (NFT access pass)

Token generation and claiming

Simultaneous listing on both decentralized and centralized exchanges (DEX & CEX)

Open project funding applications

First community voting round

First project funding distribution

Social task campaign launch

Continuous iteration and growth

### **Why DAO?**

Although Compress DAO does not operate a treasury controlled by the community, it embraces the DAO ethos through open voting and transparent participation. All funding is provided by the core team, allowing the community to focus on identifying and supporting promising startups — without the risks of treasury mismanagement.

### **Conclusion**

Compress DAO empowers the Web3 community to create real impact by identifying and supporting early-stage startups.

Through open voting, private funding, and active social engagement, we aim to decentralize opportunity and foster collective success across the blockchain ecosystem.
